PROPOSAL 2: Tshwane Community Youth Centre - Non-Profit

Organisation Overview

Name: Tshwane Community Youth Centre

Type: Non-Profit Organisation

Location: Pretoria West, Gauteng

Brief History: The Tshwane Community Youth Centre was formed 5 years ago in order to help the youth in the Pretoria West area. The centre provides free after school activities, computer classes and job assistance to youth between the ages of 14 and 25. The centre was started by community members who saw that many young people needed support after school.

Mission: Empower youth through education, skills training and community involvement.

Vision: To have a community in which all youth get the opportunity to learn and prosper.

Target Audience: High school learners, unemployed youth, parents and community donors in the Pretoria West area who want to support youth development.

Website Goals and Objectives

The goal that has been set out is to build a website that offers information for the community. The website will make it easier for people to find out what the centre does.

Specific Objectives:

1. *Inform the Community:* Supply information concerning programs, events and the paths that people can follow to get involved.
2. *Attract Volunteers and Donations:* Notify people of the ways that they could volunteer their time or make donations to the centre.
3. *Provide Resources:* Upload study guides, job advice and computer class timetables on the website for easy access.
4. *Increase Awareness:* Make more people aware of the centre and its work in Pretoria West.

Indicators of success to be measured: Number of website visits, number of volunteer registrations, and number of inquiries for donations received through the website.

Current Website Analysis

There is no current website for the centre. They rely on WhatsApp and posters only to share information with the community.

Weakness: It is difficult for people to access the information and it looks less professional without an online presence.

Opportunity: The creation of the website will facilitate more visibility for the centre by donors and volunteers. It will also help parents and schools find information easily.

Features of Website and its Functionality

1. *Homepage:* Welcome note and photos of youth activities to show what happens at the centre.
2. *About Us Page:* History, mission statement, and information about team members and staff.
3. *Programs Page:* After-school program, computer skills and jobs program list with descriptions.
4. *Events Page:* Events calendar and information about workshops and community events.
5. *Get Involved Page:* Volunteer registration form and donations information for people who want to help.
6. *Contact Page:* Physical address, phone number, email address and map to help people find the centre.

Website Design and User Experience

Colour Scheme: Blue and yellow to represent trust, hope, and energy. These colours are bright and will appeal to young people.

Typeface: Arial for body text, bold headings for easy reading.

Layout: Simple, clean design and large buttons so it is easy to use. The website should be cellphone-friendly since most youth are using cellphones.

User Experience: Simple menu at the top to navigate easily and quickly between different pages.

Technical Specifications

Languages: HTML, CSS will be used to build the website.

Hosting: Free hosting such as GitHub Pages for now to save money.

Domain: <http://tshwaneyouth.org.za> depending on the budget.

Timetable and Milestones

Week | Task
Week 1 | Research and planning
Week 2 | Design and develop wireframes, content
Week 3 | Develop HTML pages
Week 4 | Test and submit

Budget Estimates

Item | Cost Estimates
Domain Name | R150/year
Hosting | Free - R500/year
Development | R0 - student project

Total | R150 – R650
