Organisation: Pretoria Fresh Bakery

1. Organisation Description

Name: Pretoria Fresh Bakery

Type: Small Business – Bakery

Location: Hatfield, Pretoria, Gauteng

Background: Pretoria Fresh Bakery is a family-run small bakery that has been operating for 3 years now. The bakery produces fresh bread, cakes, muffins, and pastries for the consumption of local students and families living in the Hatfield area. The business focuses on quality and freshness. At present, customers have to visit the bakery to purchase these products because there is no online platform.

Mission: To offer fresh, affordable, and tasty baked products daily to our community.

Vision: To be known as the most loved bakery in Pretoria for providing quality baked products and services.

Target Market: Students from nearby universities, families, and office goers in Pretoria who are looking for fresh baked goods.

2. Objectives for Website Development

The primary objective of this project is to develop a practical and aesthetically pleasing website for Pretoria Fresh Bakery. The website will help the business grow and reach more customers online.

Specific Objectives:

1. *Inform Customers:* To inform customers about business opening time, address, and contact details clearly on the website.
2. *Showcase Products:* To display pictures and descriptions of bread, cakes, muffins and pastries that the bakery sells.
3. *Brand Building:* To add professionalism to the bakery and to bring in more customers through an online presence.
4. *Easy Communication:* To provide a contact form and contact details so customers can ask questions or place orders.

KPIs: Website visits per month, contact form submissions, and increase in phone orders after the website launch.

3. Analysis of Existing Website

There is no existing website for Pretoria Fresh Bakery. The bakery currently uses Facebook and word of mouth for communication with customers.

Weaknesses: Customers are unable to view the entire menu online. The business also cannot access online customers who search for bakeries on Google.

Opportunities: A website will enable the bakery to reach out to more people in Pretoria. It will also make the business look more professional and trustworthy to new customers.

4. Proposed Features of the Website

1. *Home Page:* Large image of fresh bread, welcoming message, and quick links to other pages.
2. *About Us Page:* History of the bakery and information about its owners and staff.
3. *Products Page:* List of products with images and their prices for customers to view.
4. *Specials Page:* Deals of the week and information about new products.
5. *Contact Page:* Address, embedded map, phone number, email address, and contact form.

5. Design and User Experience

Colour Scheme: Brown, cream, and orange to represent bread, warmth, and freshness. These colours will make the website feel welcoming.

Typography: Heading typeface is Playfair Display and Open Sans is used for body typeface to ensure readability.

Layout: Good layout design with clear sections and pictures of products. The website will be mobile-friendly as most clients will be using phones to access it.

User Experience: User-friendly menu located at the top of the website. Navigation will be simple so customers can find information quickly.

6. Technical Specifications

Programming Languages: HTML and CSS will be used to build the website.

Hosting: Cheap web hosting e.g. xneelo or Afrihost will be used to keep costs low.

Domain Name: www.pretoriafreshbakery.co.za

7. Timeline and Milestones

Week | Task
Week 1 | Planning and Research
Week 2 | Design and Write Content
Week 3 | HTML Coding of pages
Week 4 | Testing Website and Submission

8. Cost Budgeting

Item | Cost Estimate Domain Name | R120/year Web Hosting | R80/month Development | R0 - Student Project

Total First Year Cost | R1080
